DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-12 in the reply filed on 7/26/07 is acknowledged. The traversal is on the ground(s) that Groups I and II are interrelated as processes preparing a filled halobutyl elastomer and a filler used in the process. This is not found persuasive because the process of Group I is classified in Class 523, subclass 216, while the process of Group II is classified in class 252, subclass 182.34. Searching both inventions would impose undue burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1, 2 and 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Clayton et al. 3,337,391.
4. Applicant's arguments filed 7/26/07 have been fully considered but they are not persuasive. The titanium compound described by the reference is an organometallic compound. Organometallic compounds are organic. In column 1, line 26, the compound is identified as an "organic titanium compound". The silazane is optional and as such it does not have to be considered. The rejection is maintained.
5. Claims 1-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Resendes et al. 7,015,265..

Art Unit: 1714

6. Applicants' arguments filed 9/29/06 have been fully considered but they are not persuasive. Common ownership does not obviate an anticipation rejection. The silazane is optional and does not have to be considered. The rejection is reinstated.
